GET REAL MATH: MATH TEACHER ADVISORY MEETING & NEXT VIDEOS

14 videos have been filmed at various member companies. The videos highlight practical math applications teachers can use in the classroom. Billie Rau, Plymouth Middle School math educator, was introduced as the person who will be writing the curriculum for the new math videos. Ann confirmed Ron Tupper as the videographer for the next round of videos. The timeline is as follows.

- **March** – Math Advisory Committee Meeting at Fox Valley Technical College
- **April** – Each company will be met with individually to discuss educator requests for skills to be featured in the upcoming videos.
- **May** – Filming
- **June/Mid-July** – Produce Videos
- **Mid-July** – Begin Writing the Curriculum
- **October 1** – Curriculum and Videos Completed
- **October** – Host the Get Real Math! Video Premiere. The event will be held outside of Green Bay, possibly in Manitowoc or Sheboygan.

The goal is to eventually have a video for every middle school math skill. Three math teachers representing; Bonduel, Brillion, and New London, have expressed interest in serving on the Math Advisory Committee. Members will meet twice a year. **Ann will be emailing to schools another request for committee signup. She will follow-up by sending a Doodle poll to determine the best date/time for the March Math Advisory Committee meeting.** The meeting will be scheduled for 1 to 1-1/2 hours. A list of skills currently being taught will be sent with the meeting invite.

An overview of the current videos will be given at the March Math Advisory Committee meeting. Teachers will be asked their impressions of the videos and how they can be enhanced. Members will decide what they want included and the best format. Ariens Company, Nercon Eng. & Mfg., Inc. and Rockline Industries are the companies participating in this round of videos. It was suggested future videos feature other manufacturing careers like accounting, finance, etc.
