

# Environmental/Health & Safety Manager

## We Are...

An ISO 9001 certified, privately-owned, family business with over 68 years of experience in the aluminum foundry industry. Eck excels in light-weighting, high temperature aluminum alloys, and in complex castings.

With a foundation of quality, Eck delivers aluminum castings to customers in the military, hybrid vehicles, commercial trucking, aerospace, medical, industrial and energy markets.

Eck Industries is known for innovation and developing methods to cast challenging alloys and components.

With an average service level of 17 years our employees clearly make a difference in our company.

## Position Overview:

**Responsible for planning, leading and supporting the development and implementation of a safety culture throughout the facility, by developing programs to support the safety initiative.**

### Essential Functions

- Investigate industrial accidents, injuries, or occupational diseases to determine causes and preventive measures; to determine how such accidents might be prevented in the future.
- Administers Workers Compensation, processes leaves and return to work in coordination with human resources.
- Obtain all required permits and renewals, complete all required annual reports, filings, and other documentation as required by federal, state and local government agencies to maintain HSE regulatory compliance.
- Accountable for all OSHA compliance initiatives including hazard communication, lockout/tagout, confined space entry, recordkeeping and reporting, emergency action plans, powered industrial trucks, hearing conservation, and other required safety programs.
- Lead the monthly safety committee meetings, and direct the efforts of the safety team.
- Conduct safety, environmental, and security audits to ensure compliance, evaluate performance, identify corrective action and implement follow up assessments.
- Plan, implement and coordinate training programs as required to maintain compliance with regulations and internal standards and improve safety/environmental performance.
- Act as primary contact for all employees on accident reporting, investigation and hazard elimination.

### Desired Skills and Experience

- Bachelor's degree in a related degree field required. In lieu of degree, consideration will be given to related experience.
- A minimum of 5 years of related safety experience within a manufacturing environment.
