Oshkosh North High School received the Manufacturing Partnership Award from the NEW Manufacturing Alliance for its work with Oshkosh Corp. in the design replica of the company's first vehicle ever produced – Old Betsy. The project was in celebration of the company's 100th anniversary.

The grill is a part of Project G.R.I.L.L. (growing readiness in learning and leading) an educational partnership between a manufacturer and high school that strives to provide students with skills such as design, budgeting, welding, assembly and marketing during the building of the grills.

"We are excited that Oshkosh Corp. has partnered for the second year with the Oshkosh Area School System on this program to mentor and raise awareness of the numerous careers that manufacturing offers and excited that this partnership was recognized on a regional basis," said Patti Andresen-Shew, director of education and talent development, Oshkosh Chamber of Commerce.
