

Maintenance II – Full time hourly position

Oversee, coordinate, evaluate, perform and optimize processes for maintenance equipment and facilities to support the achievement of business goals.

Manufacturing Engineer – Full time salaried position

Evaluates manufacturing processes by designing and conducting research, applying knowledge of product design, fabrication, assembly, tooling and materials in collaboration with the Engineering and Production.

Material Handler – Full time hourly position

Ensure materials and components are available for production in a timely manner. Be a backup to the delivery route driver – CDL required.

Quality Assurance Leader – Full time salaried position

Ensure our products meet the required quality standards, collaboratively seeking out root cause of quality concerns, actively be part of the solution, and assist with training/re-training employees to the quality standard.
