

Mid Valley Industries, LLC

Production Control Manager/Master Scheduler-Planner

Summary

This position is responsible for all forecasting activities including the Master Schedule and Capacity Planning Models, as well as the daily Production Control activities to execute the plan. The following description of the “Primary Responsibilities” for the position is an accurate, but general, description of the job duties and by no mean all-inclusive of the duties that may be assigned.

Primary Responsibilities

1. Develop and maintain the Master Schedule, including multiple levels of aggregation for multiple time horizons as part of a demand planning function.
2. Collaborate with Sales and Operations to pro-actively identify areas of constraints or open capacity to develop appropriate actions.
3. Provide the Commercial Team with required level of details for order status and projections to communicate with our Customers to deliver outstanding Customer Intimacy.
4. Lead the efforts to mitigate issues related to schedule, including machine / work assignments, overtime planning and detailed recovery plans.
5. Improve the Company’s On-Time Delivery (OTD) performance.
6. Monitor and update actual vs. quoted times to identify areas for process improvements or adjustments to pricing.

Competencies

- ✪ Two year degree required, College degree desirable in Manufacturing or Industrial Engineering, in the absence of a degree at least 10 years of occupationally specific knowledge of part processing is required.
- ✪ Must have at least 5-7 years of experience in machining or manufacturing.
- ✪ Experience in project management and Continuous Improvement
