### Manufacturing & Operations OPERA01577

- Posted: August 29, 2018
- Full-Time
- *Location: 1113 Maryland Ave Sheboygan, WI 53081, USA*

## Job Details

### Description

Position is responsible for the strategic and tactical planning, direction, and coordination of Wisconsin operations, including: manufacturing, process support, health, safety, and environmental, ongoing high performance work system development, maintenance of facilities and grounds, temp staffing relationship, and total productive maintenance. Responsible for the direct manufacture of products and the lowest possible cost consistent with quality, productivity, and delivery specifications using lean manufacturing tools and techniques. Responsible for creating a strategic alignment with the Technical Resources of the WI Plant to ensure project management is executed effectively through the process support resources of operations. Responsible for ensuring the highest standards and expectations of safety are provided, practiced, and enforced. Responsible for ensuring the highest standards of front line leadership are provided, practiced, and enforced. Indirect responsibility for ensuring the effective coordination of manufacturing activities with R&D, sales, and marketing functions. Overall responsibility for providing leadership, vision, and PBL enforcement to the Wisconsin operations staff to enable attainment of plant KPI's and optimize overall plant profitability in the face of continuing product cost reduction pressures and new product development efforts.

### Requirements

Requires a Bachelor's Degree (BS) with a major in business, engineering, industrial technology, or a related technical discipline. MBA or active pursuit thereof is highly preferred.

A minimum of 10 years of manufacturing leadership experience with varying degrees of cross functional leadership or relationship building with...maintenance, engineering, quality assurance, safety, warehousing/logistics, and direct production.

Leadership experience in high speed converting and/or consumer products industry preferred.

Strong functional knowledge and experience with lean manufacturing tools and techniques, high performance work systems, and the ability to develop and sustain those principles within the organization.

Strong leadership and communication skills with ability to flex leadership style required.

Knowledge and experience in the following areas a plus. Financial acumen – understanding the triggers to drive operating profit, automation/robotics technology, concepts of Manufacturing 4.0 (IoT), and a background in regulated/FDA products.

Grade Level: 15

FLSA Status: Exempt
