

Controls Engineer (Howard, WI)

Zepnick Solutions, Inc., a leader in industrial automation engineering and equipment, located in Green Bay, Wisconsin, has an immediate opening for an experienced, creative and dynamic Controls Engineer.

The desired candidate will have the following knowledge/experience:

- Proficiency in Allen-Bradley PLC Programming Software (RS Logix, Studio 5000)
- 5 years' Machine Controls or Packaging Experience in the Pulp and Paper or Food and Dairy Industries
- Ability to develop a PLC program from scratch or customize a program based on customer specific templates. Must have flexibility in programming style to adapt to customer standards
- Proficiency in Wonderware InTouch, Wonderware Archestra & FactoryTalk HMI development
- Experience designing controls system networks using Ethernet, ControlNet and DeviceNet
- Experience designing, programming, and configuring Variable Frequency Drive systems, specifically Rockwell hardware

This is a direct-hire position. In addition to an attractive wage, Zepnick Solutions, Inc., offers a full benefit package including health, life and disability insurance, 401(k), paid vacation and holidays.
