

## **BPM Inc. - Maintenance Millwright**

### **Qualifications:**

Successful candidates must have a desire and ability to work as a multi-skilled technician in a continuous process industry. Applicants must have a stable, verifiable work history, with a demonstrated commitment to safety. We're looking for a strong, in-depth millwright/mechanical knowledge and practical application experience in areas such as:

- General mechanical systems (pumps, gear boxes, motors, bearings, rigging, equipment repair and rebuilding)
- Welding (mild steel and stainless, repair and new fabrication)
- Pipefitting (repairs and new installation)
- Operation of saws, drill press, grinders, lathe and hand tools
- Equipment installation including couplings and alignment
- Basic computer skills
- Analytical process troubleshooting including mechanical print reading and using troubleshooting manuals

Preference will be given to individuals with a completed apprenticeship or advanced millwright/mechanical experience in a continuous process industry.

Requires the ability to work in a team environment and willingness to work flexible hours.
